Multispecialty Clinics

Our multispecialty clinics provide comprehensive, convenient care for children with complex needs through team-based programs involving multiple specialists.

Asthma (UCAN)
Bariatric Surgery
Cerebral Palsy
Cleft Lip and Palate
Concussion/TBI*
Craniofacial
Craniosynostosis
Eosinophilic Esophagitis
Healthy Lifestyles
International Adoption
Marfan Syndrome
Muscular Dystrophy
Neonatal Continuing Care
PANDAS/PANS
Spasticity
Spina Bifida
Thyroid Cancer
Transgender
Turner Syndrome
Vascular Malformations

Therapy Services*

Pediatric therapists provide care in a setting specially designed for children.

Assistive Technology
Nutrition
Occupational Therapy
Physical Therapy
Speech Therapy

Referral Assistance

This Referral Guide is updated regularly as our team grows. Download the latest version at chrchmond.org/referralguide.

For additional copies, questions about our services or CME opportunities, contact our outreach representatives. Our pediatric patient advocates are here to help with access or patient concerns.

Virtual visits: Answers anywhere

Health care looks a little different these days. We're here for your patients in person and "virtually" through telehealth during these challenging times. Whether your patient is a new or existing CHOR patient, we offer various ways to connect to the specialty care they need, when they need it. Call **804-828-CHOR (2467)** to schedule an appointment today. Visit chrichmond.org/telehealth to learn more about our telehealth services. We encourage you to share this page with your patients for helpful tips on how to prepare for a virtual visit.

It's safe to visit our hospitals and clinics - in person and virtually

Your patients' illnesses and injuries don't stop for a pandemic – and neither do we. We continue to evolve to safely meet the needs of our community. As we responsibly re-open clinics and restore non-urgent services that were temporarily postponed or closed due to COVID-19, we know you may have questions.

Our goal is to keep patients, visitors and health care providers safe, while caring for everyone who needs us – both in person and through expanded telehealth visits – and we have measures in place to do just that.

- Masks are required for patients, visitors and team members.
- Patients and visitors are screened with temperature checks and questions about symptoms.
- Team members are asked to self-monitor for symptoms and stay home if they're sick.
- Patients are tested prior to surgeries, procedures and hospital admissions.
- Appointments are spaced out so fewer people are in the waiting rooms.
- Special cleaning and disinfecting processes are being used for patient rooms, waiting rooms, equipment, bathrooms and everything in-between.
- Modified visitation guidelines remain in place to limit the number of people in the environment.
- There are separate entrances at some locations for patients and visitors who are experiencing symptoms and those who are not.
- 6-foot markers on the floor ensure social distancing in appointment check-in lines.
- Telehealth services for new and existing patients continue to limit in-person interactions when appropriate.
- We are collaborating with children's hospital colleagues throughout the nation and across the world to share data, research and best practices.
